

NeoTerra has released v3 of neoConneX.

This is major update and we encourage all of our customers to call in and schedule an update as soon as possible.

In this update:

Server Application

- Support for the Blackberry client as well as future Android and iPhone apps
- Run as service or windows forms application
- Internet Reverse Geocoder

Client Application

- Microsoft office style, dockable windows in the client
- Native GIS control, supporting a wide range of vector and graphics formats
- 'On the fly' - Selectable partitions

Ewan Crawford,
President
