

PRESS RELEASE

Tallysman Wireless and NeoTerra Systems launch the Sprite™ TW251 Man-Down Lone-Worker Software for MOTOTRBO™ Professional Hand Portable Radios

Orlando, FL – Feb 10th 2010 – Tallysman Wireless Inc., a leading provider of high performance, high quality wireless Telematics solutions, RF and GNSS components, today announces the release of the Sprite™ TW251 Man-Down Lone-Worker software application for MOTOTRBO™ professional hand portable radios, at Motorola's EmpowerU event at the North America Sales Conference 2010.

The Sprite™ TW251 is an inexpensive software solution for Motorola MOTOTRBO™ radio* that provides an effective Lone-Worker monitoring system. It is an important addition to worker safety programs, providing lone-workers and workers in hazardous environments with means to call for help in the event of an emergency or for automatic alarm generation in the event of incapacitation.

The Sprite™ TW251 effectively addresses safety concerns, providing field operators the means to trigger an alarm, which in open environments can include GPS location information. It utilises an algorithm that signals potential man down occurrences, through no-movement and sudden change of orientation detection, with reset by operator actions (button press), movement detection, and/or by a novel "double-tap reset".

*Supports both display and non-display MOTOTRBO™ hand portable radios

** MOTOTRBO™ Expansion Board: p/n QA1638 pre-installed in radio or PMLN5496AS
Expansion Service Kit

About Tallysman Wireless

Tallysman Wireless Inc. manufacture high performance, high quality wireless products for a wide range of professional mobile applications, Tallysman Wireless' core competencies include digital wireless networks, and RF GNSS components design. In addition, Tallysman Wireless provides custom antenna and RF system solutions for industrial and military applications.

About NeoTerra Systems

NeoTerra Systems Inc, develops a range of Fleet Management solutions for text messaging, GPS vehicle location (AVL) and dispatch management. NeoTerra Systems provides premium quality solutions for the LMR industry, feature rich applications while maintaining simplicity of use.
